NIPIGON™

It seemed only fitting to name this Williams lure after the famed Canadian watershed that produced the world record speckled trout. The Nipigon is a slender bodied 2-1/2", 1/3 oz spoon finished in the trademark Williams precious metal finishes of genuine silver and 24k gold. It imitates a baitfish in distress. Ideal as a trolling spoon it is equally as effective when cast or jigged. A multispecies lure that can be worked at a wide range of speeds.

Finished in the trademark Williams precious metal finishes, nothing reflects any and all available light like genuine silver and 24k gold.

The Nipigon is offered in 8 colours. 3 mirror finishes of gold, silver and 1/2 & 1/2 mirror. 3 silver nu-wrinkle finishes with accent colours of; blue, red and green, a gold nu-wrinkle with orange accent and a nu-wrinkle 1/2 & 1/2. All have a Red treble and a 3D eye.

TROPHY I® II®

Genuine silver plated Trophy I and Trophy II lures have been extensively tested in both river and open water conditions. Williams Trophy I (1/2 oz) and Trophy II (3/4 oz) are excellent casting and trolling lures. They are most effective when trolled or retrieved at a slow speed where their unique design provides maximum action, flash and enticing vibrations.

Sporting the trademark Williams stabilizing ridge, the Trophy series has become a favorite with anglers. From pike to Great Lakes salmon, the Trophy has proven itself. This wide bodied spoon emits strong vibrations and its large surface area produces plenty of flash. The heavier weight of the Trophy allows for longer casts and holds its depth upon retrieve or while trolling.

Silver back

RIDGE | BACK™

The Ridge | Back series was introduced in Williams 100'th anniversary year and therefore took on the RB100 name to commemorate the occasion.

A compact and heavier casting spoon series, the Ridge | back weighs in at 2/5 oz and measures 1-7/8". Its shape and design are proven. Ideal for use casting where its' compact design and additional weight allow for less resistance and longer casts. It can also be trolled and jigged. A versatile lure, as effective on the Great Lakes breakwalls as it is in the back country inland lakes. A multi species spoon.

Williams's trademark genuine silver and 24K finishes reflect any and all available light deeper and farther. The Ridge | Back is offered in the classic metallic finishes of; silver, gold, 1/2 & 1/2 as well as copper. Proven and productive colour patterns on a silver or gold base round out the selection for trout, salmon, pike, bass and walleye.

A Canadian classic with a worldwide reputation.

1 SIZE, 16 COLOURS		
Stock No.	Length	Approx. Weight
RB100	1 7/8" - 4.8 cm	2/5 oz. - 11.4 g.

DARTEE®

The Williams Dartee dates back to the 1940's. In its original form or in the new modern day version, the Dartee has been producing for anglers for over 75 years.

Well known for trout and salmon, this versatile spoon is most often used in a trolling presentation but is also popular as a jigging spoon, especially on the ice. Lake trout, salmon, rainbows and browns all find the Dartee difficult to resist. We also receive many comments from anglers targeting walleye with the Dartee, a great baitfish imitation.

The Dartee incorporates the advantages of Williams genuine silver finishes for flash and visibility, popular and effective colour accents and its unique design which allows the Dartee to work well at a variety of speeds, imparting a "darting" action which predators cannot resist.

3 SIZES, 6 COLOURS		
Stock No.	Length	Approx. Weight
D1	2 1/4" - 5.7 cm	1/6 oz. - 4.7 g.
D2	2 3/4" - 7 cm	1/4 oz. - 7.1 g.
D3	3 1/2" - 8.9 cm	1/3 oz. - 9.5 g.

WABLER® LITE W55

HALF THE WEIGHT OF THE REGULAR WABLER

Williams Wabler Lite series offers the classic original Wabler in 1/2 the weight. This Lite series is a perfect option for shallow water presentations where you will have the advantage of the proven action of the Wabler and the flash of the precious metal finishes in a spoon which will run shallower and work at even the slowest trolling speeds.

Short cast it into the shallows or pockets and let it flutter down. Use it as an attractor without a hook followed by 12" to 24" of Maxima line and a fly or hook and bait or troll it deeper using leadcore or a downrigger.

The Wabler Lite really shines in a slow retrieve or trolling presentation where its lighter weight allows it to work at slower speeds and run shallower than the traditional classic W50 Wabler. The design originated from angler comments suggesting just that. Especially in the early Spring, certain species are found in shallower water that warms first after ice out. To be able to target these fish you need a lure that can effectively be worked in the shallower water and often, a slower presentation is more effective at this time of year. Therefore you need a light weight lure that will not sink down through the water column when worked at a slower speed. The Lite works just fine under these conditions and with the addition of a little weight, is just as effective in deeper water presentations. It is not limited to a slow troll either with added weight to keep it down.

1 SIZE, 11 COLOURS

WABLER®

THE CLASSIC ORIGINAL WABLER TIME TESTED AND PROVEN

The Williams Wabler is the lure that founded the fishing tackle division of the Williams Company more than 100 years ago. The most recognized and still today most popular model in the Williams series, the Wabler has been a mainstay of anglers. Originally popular as a lake trout spoon, the Wabler has proven itself, as the photo gallery of past literature will attest to, on a multitude of species including: rainbows, browns and all members of the trout family. A northern pike favourite, musky, walleye and salmon as well as salt water species in coastal waters.

The Wabler, as are all Williams lures, is stamped from premium polished brass. A multi-step plating operation then applies the genuine silver and/or 24k gold finishes Williams lures are renown for. These are not standard silver and gold finishes either. The final step in the Williams plating process incorporates a further plated "electroclear" outer coat which is then baked on. This process does not dull the finish as a laquer would. It does render Williams silver and half & half finishes saltwater resistant and basically tarnish proof.

The Wabler is a versatile spoon which works equally well at a wide range of speeds due to its stabilizing ridge and shape. The ridge which has become a trademark of Williams lures prevents the Wabler from rotating without changing the proven shape and action of the lure. This ridge works so well, Williams was awarded a US and Canadian patent for it. One of the few patents ever awarded a spoon. Time tested and proven, a true Canadian classic with worldwide recognition.

The classic silver and gold finishes that made the Wabler a staple, are the same finishes found under the colour accents, natural presentations like the Frog pattern and the not so natural such as the Red & White and the 5 of Diamonds. The underside of these lures is the genuine silver finish found on the regular silver Wabler.

The silver under side offers plenty of flash muted by a color accented or printed top side. If a certain colour is not producing, experiment and find the colour that will for that particular day, lake or species. Red & White and the 5 of Diamonds are well known for northerns. Blue is a classic pattern for trout, etc..

WHITEFISH®

The Williams Whitefish offers a variety of weights, sizes and finishes allowing you to match the size and colour of prey larger predators are feeding on.

One of the many assets of the Whitefish is its versatility. Ideal for trolling or casting.

The size C70 Whitefish at 4 1/4" is a perfect imitation of most mature baitfish species. The larger C80 and C90 Whitefish are popular Great Lakes salmon lures as well as proven big lake trout and northern pike favourites. They are regularly used as bait or smaller lure attractors or dodgers. Their unique shape offers less resistance and the brilliant flash of the precious metal finish attracts fish from greater distances.

The unique design of the Whitefish results in a distinctive proven action. At fast, medium or slow speeds, the Whitefish is equally effective.

ICE JIG™

The Williams Ice Jig is a perennial favorite with hardwater enthusiasts. Named the "Ice Jig" it is just as effective when jigged vertically on open water. The elongated baitfish profile makes an easy and enticing target for trout, walleye and perch. Size does matter and as a rule of thumb match the size of lure to the size of your target species. The J50 is ideal for perch and whitefish, the J60 for trout, whitefish, walleye and lake trout. It also pays to experiment with larger and smaller lures on any given day or time of the year. "Match the hatch" by imitating the size of baitfish present. Tipping the odd shank of the treble with your favorite bait can entice strikes on slow days. The double limerick side hooks are offered separately to replace broken or dulled hooks on your collection of Ice Jigs.

2 SIZES, 14 COLOURS

HQ™

The Williams HQ incorporates proven Williams designs. Williams trademark genuine silver, 24 karat gold and deep copper bases are complimented by UV reactive multicolor painted finishes on a Honeycomb base material. We pulled out all the stops to design a multi species spoon series that is ideal for the Great Lakes and West Coast trout and salmon fisheries as well as the Erie walleye fishery but not limited to the Great Lakes and West Coast. The HQ is a lake trout, rainbow or brown trout spoon for any inland watershed. Northern pike and walleye also find them to their liking.

The HQ is based on historically proven fish producing patterns. Incorporated into the HQ series are "top" patterns that have consistently produced for decades. The genuine silver or 24 karat gold finish Honeycomb large scale pattern base is a natural scale presentation offering unrivaled flash and visibility, topped off with an oversized strike triggering eye.

FLASHER®

The Williams Flasher is a traditional style attractor spoon. The slow wide, side to side wobble of the Flasher followed by a baited snelled hook or fly make them hard to resist by trout or other game fish and therefore very productive. Best worked at a slow speed where the wide bodied shape offers a side to side accentuated movement that also imparts a darting action to the trailing bait.

This design of spoon has proven itself for decades. The Flasher from Williams simply improves upon a good thing by adding the trademark Williams stabilizing bar that helps to prevent rotation. A decade's old proven action enhanced by much improved visibility from Williams.

The Flasher is modeled after the original Lake Clear Wabblers. The Lake Clear brand was acquired by Brecks in 2014. When we introduced the Flasher we modeled it after the Lake Clear. It was the original spoon of that design that had proven itself an angler favourite. We did not make an exact copy but rather took the design and incorporated it into a Williams series. The F1 is slightly smaller at 2-3/4" than the original LCW1 and the F2 slightly larger at 3-3/8". See page 18-19. The Flasher includes the trademark Williams rib and is offered in different colour accents as well as the classic 1/2 and 1/2 patterns.

2 SIZES, 10 COLOURS

Liam Whetter, grandson of Gord Pyzer has had quite the mentor in angling. And it is a family tradition, his mother Jennifer Pyzer Whetter enjoys getting out on the water as well. The Williams Ice Jig is a lake trout and whitefish favourite.

CLASSIC SELECTIONS

Williams and Mooselook kits have been developed to offer the angler an assortment of proven styles and colors by species and/or by style and size of lure. These lures have been chosen from angler favorites for the species or fisheries they are targeting. The kits are comprised of classics, proving themselves to anglers since 1916.

Fishing specifically for trout, walleye or pike, choose from our 4 pack species specific kits like the 4-TK trout, the 4-TTK trout trolling or the 4-PW pike & walleye. Have a favorite lure? Choose from our series kits like the Wabler classics. Prefer to fish for stream trout or panfish, try the 4-W32M which is also a good selection for ice fishing as are the 4-J50 & 4-J60 ice kits.

The classic original Wabler is represented in 5 sizes ranging from the small W20 found in the 4-W32M kit through to the lake trout and northern pike favorites, the W50 and W60 sizes found in the 4-50 & 4-60 kits. The W40 is also featured in a classics kit. The W30 is found in the 4-W32M.

THINFISH®

ULTRA LIGHT FLUTTER SPOON

The Mooselook THINFISH is an ultra-thin flutter spoon, stamped on a premium spring brass base to retain its shape. It weighs in at under 1/6 oz. at 3" in length.

The baitfish profile and fluttering action are offered in a colour selection ranging from Copper when subtle is better or for a contrasting profile on top, through to genuine Silver or 24k Gold to address any situation. The precious metal finishes offering the brightest flash possible at any depth, reflecting any and all available light deeper and farther.

Ideally suited to lead core, wire line or downrigger controlled depth trolling. When trolling the Thinfish with lead core or wire line, pump your rod to enhance the action and impart a darting and fluttering wounded baitfish movement which will trigger followers to strike.

The Thinfish also works well run behind a dodger or larger spoon attractor. It also shines in flat lining presentations when fishing the top 10 feet. Add just enough weight 24" to 36" ahead of the Thinfish to keep it in the 2-3 foot zone at your chosen trolling speed.

GOOD FISHING!

“DEVELOPED BY AN ANGLER FOR ANGLERS”

NEW COLOUR

WOBBLER

Keeping with tradition, Mooselook continues to offer the original chrome finish #02 for the traditionalist. Genuine silver offers a much brighter flash and reflection of all available light at greater depths.

Complimenting the mirror finish colours are the nu-wrinkle hammered finishes offered in: copper, genuine silver and 24 karat gold with colour accents. The nu-wrinkle finish offers double the surface area and double the light reflection angles and area. The Honeycomb large scale finish on some colours represents a natural scale finish with increased surface area.

The classic Wobbler is also available in a smaller version. The Midget 1-7/8" 1/12oz Wobblers are perfect for light line trolling on light mono or sinking flylines, working in current on the drift or open or hard water jigging for trout and other species. They are ideal to run behind a dodger or flasher as well as other attractors such as a Williams W50 or W60 Wabler with the hooks removed.

The Mooselook Wobbler was developed in 1938 by John A. Greene on Lake Mooselookmeguntic in Maine, from where it takes its name. A Northeastern favorite in the lakes region of New England and Canada. A classic and proven trout and salmon spoon for over 70 years. For all gamefish. Fish the time-tested action of the Mooselook at a wide range of speeds. Imitate your baitfish profile using the 4 different sizes available. Experiment with colour to find the right combination.

Developed by an angler for anglers!

WINNIE SERIES

The Winnie is named after the famed trout and salmon waters of Lake Winnepesaukee in New Hampshire. This style of lure has proven itself very effective in trout waters. Especially those where smelt are the predominant forage fish. The Winnie is a very realistic smelt presentation. A 2-3/4" willow leaf slender blade trolling spoon. A flutter spoon by design weighing in at 1/4 oz. Varied retrieve or trolling speeds impart different actions.

Genuine silver and 24 karat gold finishes as well as muted copper in honeycomb scale pattern with strike triggering eyes, UV reactive.

The Winnie comes to Mooselook from the Savant lure company which we acquired in 2013. The designs the founder Tom Manning had developed over the years are proven producers. The Winnie, an original Savant design is a welcome addition to the Mooselook stable of lures.

Well known outdoor personality Patrick Campeau with a northern Quebec Ouananiche salmon taken in the rapids on a Mooselook Winnie. A great baitfish imitation for trout and salmon trolled or cast.

AVAILABLE with single siwash hooks. Add 'SS' to product code.

JAKE SERIES

Savant lures proven styles and designs are now marketed under the Mooselook brand as "The Savant Series". Packaging bears both the Savant and Mooselook brands. Mooselook state of the art plating and painted finishes are incorporated into the Savant lures series. Finishes include genuine silver, 24 karat gold and copper bases with and without painted accents. Made in North America by anglers for anglers.

The Jake was one of the two original Savant spoon series. Modeled in a classic flutter spoon design similar to the Mooselook Thinfish. The Jake is a 3" 1/3 oz spoon stamped in half hard brass rather than the spring brass of the Thinfish series. This adds some weight and imparts a different action to this classic design. Genuine silver and 24 karat gold finishes and copper. Strike attracting eyes.

Trout, walleye, pike and salmon patterns. The Jake is a versatile spoon at a wide range of retrieve or trolling speeds as well as vertically jigged.

LCW: THE ORIGINAL

The Lake Clear Wabblers originated in 1920 in Lake Clear Junction in the Adirondacks, hence the name. Mr. H. Robare, a French Canadian guide in the area fashioned the original "spoon" using a pair of tin snips and a car headlight bezel. The interior of the bezel was chrome and the exterior brass, the original finish of the Lake Clear Wabblers.

The Lake Clear Wabblers is the original spoon of this design. Copied by many but never duplicated, an eastern favourite for trout of all species. Especially sought after by anglers in; New England, the Adirondacks, Ontario, Quebec and the Maritimes, as well as trout anglers throughout North America.

Jeweler's quality finishes of genuine silver and 24 karat gold are now the standard on Lake Clear Wabblers. Nothing reflects any available light farther or brighter than silver. Gold has a distinctive reflective property deeper and brighter than brass often referred to as "gold" which it is not. Copper is a more subtle presentation. For days when a silhouette may be more effective the Black finishes offer plenty of vibration and a dark silhouette against a bright sky or light coloured shore line.

3 SIZES, 26 COLOURS

Stock No.	Length	Width	Approx. Weight	Colours
LCW1	3 1/8" - 7.9 cm	1 1/2" - 3.8 cm	1/3 oz. - 9.5 g.	All
LCW3	3" - 7.6 cm	1 1/8" - 2.9 cm	1/4 oz. - 7.1 g.	All except: BLZN, NGVS, GLRP, GLCH & BKOR
LCW5	2" - 5.1 cm	1" - 2.5 cm	1/6 oz. - 4.7 g.	S, GOLD, COP, S/BLU, S/CH, S/OR, EB, ORAN, ORMK, HHSG, HHSC, HHSGN

Richard Beauchamp of Mayfield NY holding the new NY state record speckled trout of 6.03 lbs caught in 2013 on Silver Lake. Length of 22" x 15-1/4" girth.

GANG TROLL

The Lake Clear selection also includes multi blade small trolling attractors. These lures have been around for decades and have proven their effectiveness. Add our jewellery quality finishes that reflect all available light and you have an improved and very effective lure choice. These attractors use the GM Skinner blades. This company which came to Brecks as part of Lake Clear, dates to 1874. The fluted blade style was awarded Medal and Special awards at the 1893 Chicago Exposition and the 1898 Bergen Norway show for innovation and effectiveness in design.
